

Abstract

Disclosed is a processed raw egg, and a method of,
and apparatus for, manufacturing the same, in which various
edible compositions are added and mixed to a raw egg so
5 that it can be served as a healthy food. The method
comprises: cleaning with water and sterilizing a raw egg;
an egg-shell drilling step; an edible composition injection
step; a raw egg agitation step; and a heating step. An
apparatus for carrying out the above method is also
10 disclosed.
